# MAC-CLOUD

## What the cloud?

The 'cloud' is a real buzzword, but what is it, how does it impact what you do, and is it anything really new? What is the cloud? Where is the cloud? Are we in the cloud now? These are all questions you've probably heard or even asked yourself. The term "cloud computing" is everywhere.

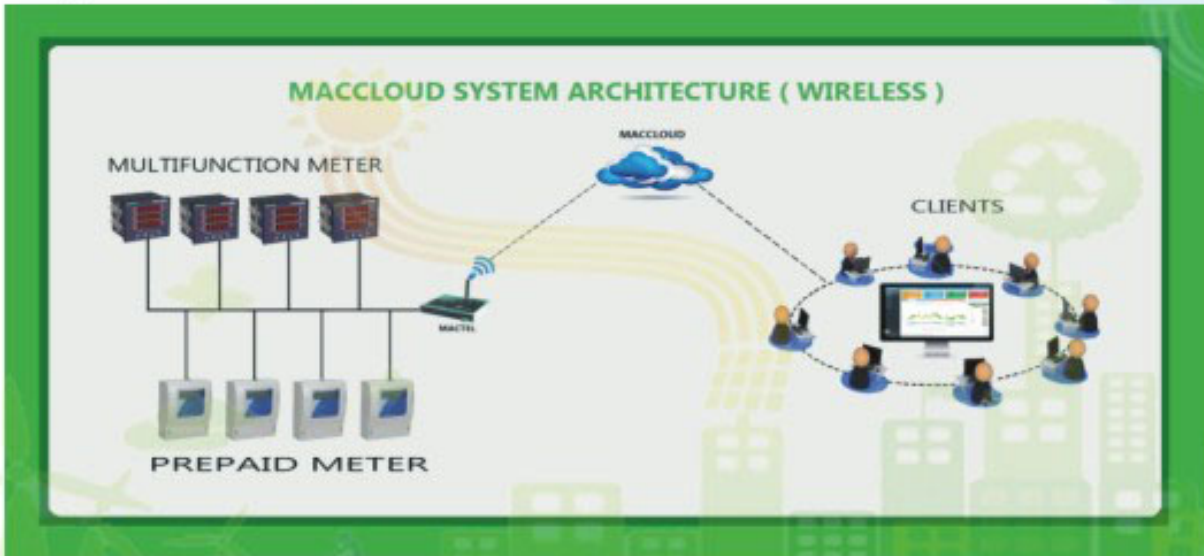

In the simplest terms, cloud computing means storing and accessing data and programs over the Internet instead of your computer's hard drive. The cloud is just a metaphor for the Internet. It goes back to the days of flowcharts and presentations that would represent the gigantic server-farm infrastructure of the Internet as nothing but a puffy, white cumulus cloud, accepting connections and doling out information as it floats.

What cloud computing is not about is your hard drive. When you store data on or run programs from the hard drive, that's called local storage and computing. Everything you need is physically close to you, which means accessing your data is fast and easy, for that one computer, or others on the local network. Working off your hard drive is how the computer industry functioned for decades; some would argue it's still superior to cloud computing, for reasons I'll explain shortly. The cloud is also not about having a dedicated network attached storage (NAS) hardware or server in residence. Storing data on a home or office network does not count as utilizing the cloud. (However, some NAS will let you remotely access things over the Internet, and there's at least one brand from Western Digital named "My Cloud," just to keep things confusing.)

For it to be considered "cloud computing," you need to access your data or your programs over the Internet, or at the very least, have that data synced with other information over the Web. In a big business, you may know all there is to know about what's on the other side of the connection; as an individual user, you may never have any idea what kind of massive data processing is happening on the other end. The end result is the same: with an online connection, cloud computing can be done anywhere, anytime

MAC-CLOUD is Newest Generation Cloud Monitoring System with many USP's in our basket can be installed up to 60% Faster than standard wired EMS (Energy Management System), which can install more sites in a day than ever before using Lesser than Less Cables.

ENERGY MANAGEMENT SOLUTION

With Our decades of experience in the field of energy management, We offer unique solutions which no other Indian manufacturers are providing

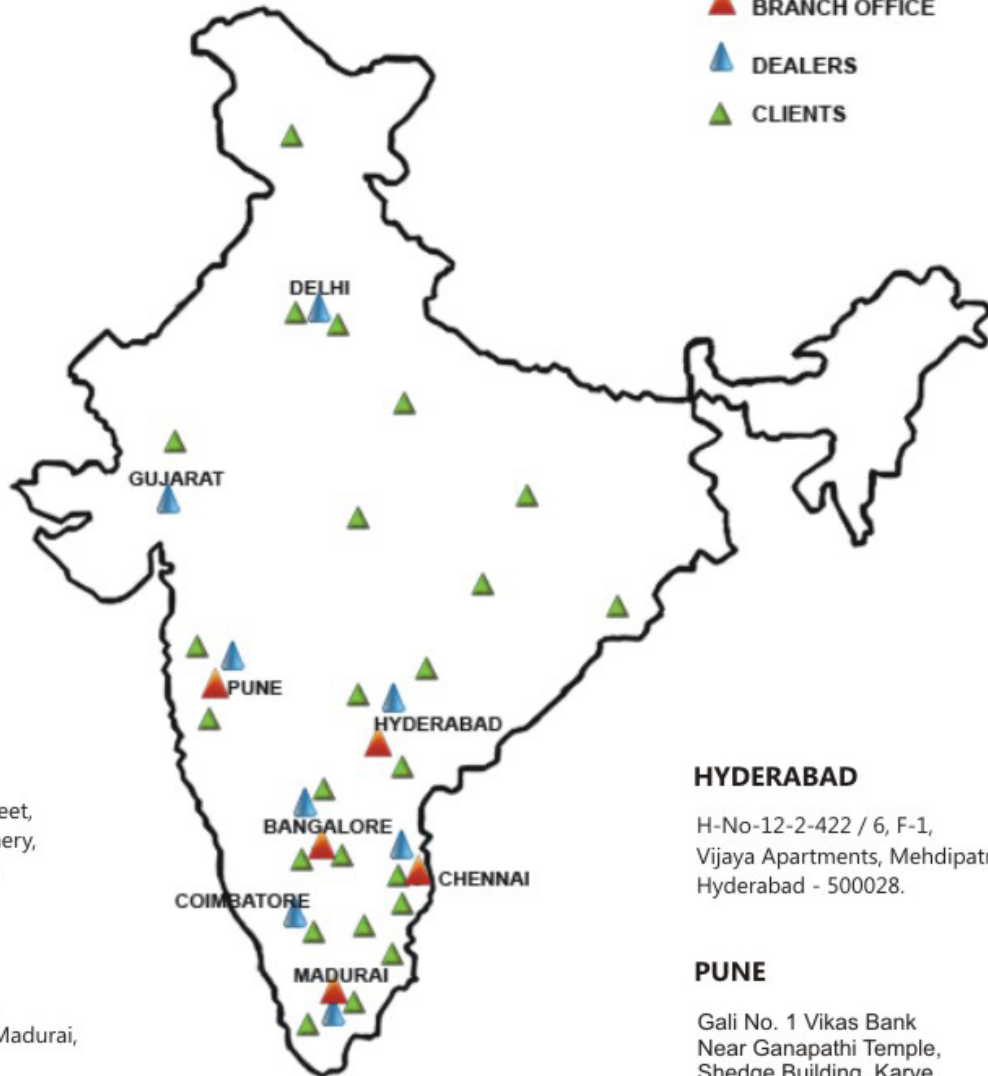

1. Maximum No. of Reports.
2. Maximum No. of Charts.
3. Shift Energy, TOD , ABT ,Distribution Loss Reports.
4. Real time Monitoring (1 minute).
5. Customization.
6. On-time & Quick Response on queries.
7. Expert-voice & Analysis (Auto generated).
8. Payback period less than 18-20 Months.
9. Product is eligible for 80% accelerated depreciation in year one as per in
10. 24/7 \* 365 Support...And Many more

**SCREEN SHOTS OF MAC-CLOUD**

- ▲ BRANCH OFFICE
- ▲ DEALERS
- ▲ CLIENTS

**CHENNAI**

No.17/20 Periyar Street,  
Nehru Nagar, Velachery,  
Checkpost, Chennai.

**MADURAI**

No 14, North Street,  
Singarayar Colony, Madurai,  
Tamil Nadu.

**HYDERABAD**

H-No-12-2-422 / 6, F-1,  
Vijaya Apartments, Mehdiapatnam,  
Hyderabad - 500028.

**PUNE**

Gali No. 1 Vikas Bank  
Near Ganapathi Temple,  
Shedge Building, Karve,  
Nagar, Pune - 411052.

**Head & Corporate Office**  
**ASIRIX INFOTECH PVT LTD**

120/1,121/1,Shiv Bhavan, 2nd & 3rd Floor,  
Venkatala, Next to Holy Rosary Church,  
New International Airport Road, Yelahanka  
Bangalore - 560064. Karnataka, India.
